

## AxtraxPro Licensing

All licensing for AxtraxPro is tied to the Hardware ID of the PC the server is installed on.

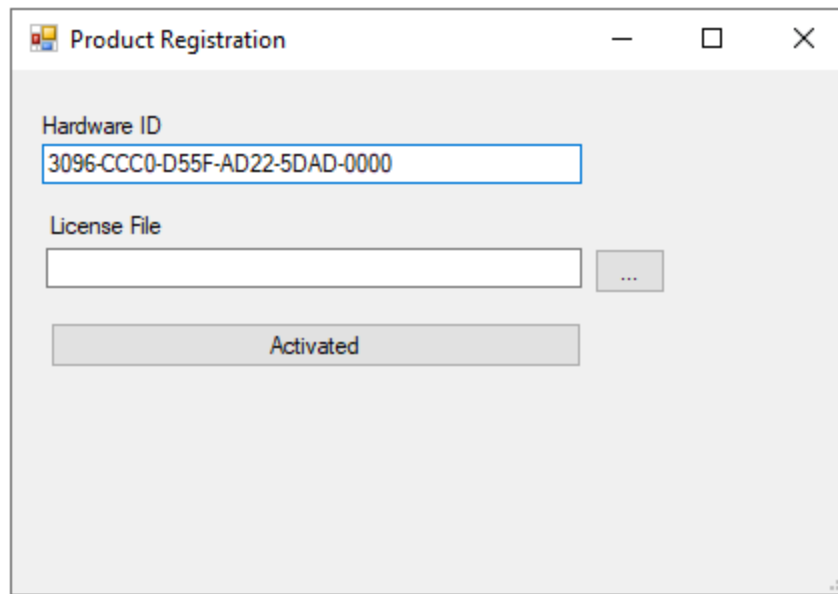

To obtain any license you must provide the HW ID, a license file is then generated for the options being purchased and tied to that HW ID only.

To find the HW ID on you system;

Open AxtraxPro Client

Go to Help, Registration

Copy the number that appears in the popup window;

If AxtraxPro is not installed, you may download a standalone HW ID utility from here;
